

ShowConf

`self.settings{}` : dictionary

`__init__(self, showconf_file)`

`settings{}` tuples are parsed from `showconf_file` xml

- `name`: name of show: string
- `mxrmfr`: mixer manufacturer: string
- `mxrmodel`: mixer model: string
- `mxrmapfile`: channel to char map: file name string
- `mxrcuefile`: cues for the show: file name string

`showconf_file` XML structure:

```
<?xml version="1.0" encoding="UTF-8"?>
<showconf>
<name>Scrooge</name>
<mixer mfr="Behringer" model="X32"/>
<mixermap file="MixerMap.xml"/>
<mixercues file="Scrooge Moves.xml"/>
</showconf>
```
